AAC 'L' ITEM NSN 6640-01-568-2351

UAs: N436

USAMMA POC: Customer Relationship Management 301-619-1288/4301 - DSN 343-1288/4301

UNIT PRICE: \$1,163.12

System Description: These baths are designed especially for the preparation of tissue paraffin sections and the elimination of wrinkles and distortions of the tissue sections. The warm, broad 1.25" edge of the bath serves as a convenient drying surface for processed slides. The exterior jacket is powder coated white aluminum; the interior is anodized a non-glossy black to reduce glare and improve visibility of tissue sections.

Features:

- Compact unit keeps water at a constant temperature to flatten wax or resin sections prior to lifting them onto a microscope slide.
- It may also be used for hot staining except with corrosive substances.
- The power cable has molded connections at both terminals.
- The power inlet socket at the back of the unit has fuses on both the negative and positive lines for optimum protection.
